

# Sorbent ST

## PRODUCT SPECIFICATIONS

|                           |                                                                                              |
|---------------------------|----------------------------------------------------------------------------------------------|
| Designation               | Sorbents of hydrocarbond and hydrocarbons derivative products, soluble cutting oil, solvents |
| Type                      | Sorbent                                                                                      |
| Description               | Universal absorbent sheet for Sorb Stance and Eco Stance                                     |
| Weight                    | 358 g/m <sup>2</sup>                                                                         |
| Colour                    | Grey                                                                                         |
| Hydrophilic               | Yes                                                                                          |
| Thickness                 | 2.7 mm                                                                                       |
| Oil absorption capacity   | 7.0 kg/kg                                                                                    |
| Water absorption capacity | 6.0 kg/kg                                                                                    |
| Tensile strength md       | 130 N/5 cm                                                                                   |
| Tensile strength cd       | 100 N/5 cm                                                                                   |
| Elongation                | 60%                                                                                          |
